Index to Volume 68

	Issue	Page
A combined analytic signal and Euler method (AN-EUL) for automatic interpretation of magnetic data, A. Salem and D. Ravat	6	1952
A constant Q technique for the numerical simulation of attenuation of seismic body waves, G. Russo and A. Zollo	5	1744
A dc resistivity and IP borehole survey at the Casa Berardi gold mine in northwestern Quebec, K. Spitzer and M. Chouteau	2	453
A finite-difference time-domain simulation tool for ground-penetrating radar antennas, B. Lampe, K. Holliger, and A. G. Green	3	971
A fourth-order finite-difference method for acoustic wave equation on irregular grids, S. A. M. Oliveira	2	672
A general reconstruction scheme for dominant azimuth 3D seismic data, M. A. Schonewille, R. Romijn, A. J. W. Duijndam, and L. Ongkiehong	6	2092
A least-squares derivatives analysis of gravity anomalies due to faulted thin slabs, E. M. Abdelrahman, H. M. El-Araby, T. M. El-Araby, and E. R. Abo-Ezz	2	535
A new method for continuation of 3D potential fields to a horizontal plane, S.-Z. Xu, C.-H. Yang, S. Dai, and D. Zhang	6	1917
A new sea-floor gravimeter, G. S. Sasagawa, W. Crawford, O. Eiken, S. Nooner, T. Stenvold, and M. A. Zumberge	2	544
A proven method for acquiring highly repeatable towed streamer seismic data, O. Eiken, G. U. Haugen, M. Schonewille, and A. Duijndam	4	1303
A quantitative appraisal of airborne and ground-based transient electromagnetic (TEM) measurements in Denmark, A. V. Christiansen and N. B. Christensen	2	523
A 3D cylindrical PML/FDTD method for elastic waves in fluid-filled pressurized boreholes in triaxially stressed formations, Q. H. Liu and B. K. Sinha	5	1731
A useful resorting in surface wave method with the autojuggie, G. Tian, D. W. Steeples, J. Xia, and K. T. Spikes	6	1906
A versatile algorithm for joint 3D inversion of gravity and magnetic data, L. A. Gallardo-Delgado, M. A. Pérez-Flores, and E. Gómez-Treviño	3	949
Abdelrahman, E. M., A least-squares derivatives analysis of gravity anomalies due to faulted thin slabs	2	535
Abdelrahman, E. M., New methods for shape and depth determinations from SP data	4	1202
Abo-Ezz, E. R., see Abdelrahman, E. M.	2	535
Accaino, F., see Vesnaver, A. L.	3	815
Adaptive decomposition of multicomponent ocean-bottom seismic data into downgoing and upgoing P- and S-waves, K. M. Schalkwijk, C. P. A. Wapenaar, and D. J. Verschuur	3	1091
Agayan, S., see Mikhailov, V.	1	168
al-Garni, M., The paradox of anisotropy in electromagnetic loop-loop responses over a uniaxial half-space	3	892
Aliasing in wavefield extrapolation prestack migration, Y. Zhang, J. C. Sun, and S. H. Gray	2	629
Alkhalifah, T., An acoustic wave equation for orthorhombic anisotropy	4	1169
Alkhalifah, T., Tau migration and velocity analysis: Theory and synthetic examples	4	1331
Amblard, P.-O., see Pedersen, H. A.	2	677
Amplitude and AVO responses of a single thin bed, Y. Liu and D. R. Schmitt	4	1161
Amplitude corrections for randomly distributed heterogeneities above a target reflector, C. M. A. Sick, T. M. Müller, S. A. Shapiro, and S. Buske	5	1497
Amundsen, L., see Ikelle, L. T.	1	16
An acoustic wave equation for orthorhombic anisotropy, T. Alkhalifah	4	1169
An efficient finite-difference scheme for electromagnetic logging in 3D anisotropic inhomogeneous media, S. Davydycheva, V. Druskin, and T. Habashy	5	1525
An inclusion-based model of elastic wave velocities incorporating patch-scale fluid pressure relaxation, S. R. Taylor and R. J. Knight	5	1503
Analysis of conductivity of random media using dc, MT, and TEM, J. Bigalke	2	506
Analysis of image gathers in factorized VTI media, D. Sarkar and I. Tsvankin	6	2016
Analytical and numerical analysis of tomographic resolution with band-limited signals, E. Priolo and C. Chiaruttini	2	600
Angle-domain common-image gathers by wavefield continuation methods, P. C. Sava and S. Fomel	3	1065
Anisotropic inversion of seismic data for stressed media: Theory and a physical modeling study on Berea Sandstone, D. Sarkar, A. Bakulin, and R. L. Kranz	2	690
Anisotropy correction for deviated-well sonic logs: Application to seismic well tie, B. E. Hornby, J. M. Howie, and D. W. Ince	2	464
Announcements	4	1435
	5	1770
	6	2120
Aperture effects in 2.5D Kirchhoff migration: A geometrical explanation, T. Hertweck, C. Jäger, A. Goertz, and J. Schleicher	5	1673
Application of artificial intelligence for Euler solutions clustering, V. Mikhailov, A. Galdeano, M. Diament, A. Gvishiani, S. Agayan, S. Bogoutdinov, E. Graeva, and P. Sailhac	1	168
Arcone, S. A., Propagation of a GPR pulse in a thin surface waveguide	6	1922
Arcone, S. A., see Moran, M. L.	2	559
Ardau, F., see Balia, R.	5	1446
Arns, C. H., see Knackstedt, M. A.	6	1822
Asymptotic pseudounitary stacking operators, S. Fomel	3	1032
Autocorrelogram migration: IVSPWD test, J. Yu, L. J. Katz, F. Followill, H. Sun, and G. T. Schuster	1	297
Autocorrelogram migration: Theory, G. T. Schuster, F. Followill, L. Katz, J. Yu, and Z. Liu	5	1685
Automated anomaly picking from broadband electromagnetic data in UXO survey, H. Huang and I. J. Won	6	1870
AVO polarization and hodograms: AVO strength and polarization product, P. N. Nsoga Mahob and J. P. Castagna	3	849
Baker, G. S., Near-surface seismic reflection profiling of the Matanuska Glacier, Alaska	1	147

Hardrock Seismic Exploration

Edited by David W. Eaton, Bernd Milkereit, and Matthew Salisbury

Seismic methods have excellent depth penetration and resolving power for deep exploration in hardrock terranes. Through integrated case histories and introductory chapters on the basic principles of seismic acquisition, processing, modeling, and interpretation techniques, this book strikes a fine balance between tutorial, review, application, and future research directions, emphasizing the growing importance of seismic exploration methods in the hardrock environment ("old" techniques applied to "new" targets). Researchers interested in high-resolution applications of crustal seismology, geophysicists involved with mineral exploration and development, geotechnical engineers, and seismic processors will find this book an invaluable aid in the challenges of seismic exploration of hardrock terranes.
